SYMPHIA ONE. VIDEO-BASED COMMAND AND CONTROL.

Symphia™ One, part of Cognyte's Situational Intelligence Solutions portfolio is the heart of the unified security command center for mission critical environments, transforming the Security Operations Center (SOC) by enabling intelligent, data-driven security management and response while increasing operational efficiencies and reducing costs.

In today's data-driven environment, security managers and operators rely on a multitude of solutions and systems to ensure comprehensive protection of people and property, which often include video surveillance, access control, alarm notifications, and more. This influx of information can often be overwhelming, and in most cases, manual processes are used to manage across these domains in an attempt to achieve a coordinated response.

Symphia One delivers a single, unified platform for the modern-day SOC with video at the center, providing integrated event management and response, allowing operators to maximize situational control and determine the appropriate intelligence-powered response.

QUICKLY ATTAIN THE INTELLIGENCE TO ACT

Integrating video along with related device state information, together in a dynamic, map-based interface, helps ensure decisions and actions are based on correlated data, rather than on video alone.

MANAGE ALARMS FASTER AND MORE EFFECTIVELY

Achieve faster response with sophisticated alarm management tools, delivering actionable intelligence derived from data received from connected systems and a powerful rules engine to automatically manage events and execute actions.

Forensic investigation is a critical component of any mission-critical security strategy as it helps provide better situational awareness and can assist in keeping people and property safe. However, because of the overwhelming number of data points to consider, investigations are often time-consuming and burdensome to the security organization.

Symphia One is a central part of modern-day intelligent investigations. Based on data-driven search, Symphia One enables investigators to streamline their work, achieve rapid access to critical data faster and improve the organization's security performance.

INCREASE OPERATIONAL EFFICIENCIES

Unify existing security systems to a single security management solution, based on an open platform structure. Experience simpler day-to-day security operations with accurate visualization, effective response and investigation and improved operational efficiency.

PERFORM FASTER MORE COMPREHENSIVE INVESTIGATIONS

An advanced search engine for data-driven investigations provides visual representation of correlated data collected from both video sources and integrated systems. Manual collection and evaluation of multi-system data and sensors is no longer needed to set up an investigation.

PROTECT WHAT MATTERS MOST.

Symphia One provides rich functionality and user experience assisting to solve day-to-day security issues faster and enhance security operations. Advanced video management, bi-directional, deep integrations to 3rd party systems, superb utilization of dynamic mapping, sophisticated investigation engine and a complete deployment visual health monitoring – all are enabling the security organization to drive excellence and protect what matters most.

ABOUT COGNYTE

Cognyte is a global leader in security analytics software that empowers governments and enterprises with Actionable Intelligence for a Safer World™. Our open software fuses, analyzes and visualizes disparate data sets at scale to help security organizations find the needles in the haystacks. Over 1,000 government and enterprise customers in more than 100 countries rely on Cognyte's solutions to accelerate security investigations and connect the dots to successfully identify, neutralize, and prevent threats to national security, business continuity and cyber security.

ABOUT COGNYTE SIS

Cognyte's Situational Intelligence Solutions helps enterprises and governments manage complex security operations, fuse information from various sources, analyze vast amounts of data, and gain insight for better incident management, response and investigations.

With our solutions, organizations can see what's happening across their operations, make quick and confident decisions for decisive actions. Powered by our Symphia portfolio of solutions, we help our customers orchestrate better outcomes to protect what matters most.
